

Region 3 GPRA Baseline RCRA Corrective Action Facility

Pennsylvania House, Inc.

**137 North 10th Street
Lewisburg, PA 17837-1388
Congressional District 5
EPA ID #: PAD003026762
Final Update**

Current Progress at the Site

On March 22, 2000, EPA issued an Agency Determination that No Further Action is needed at the Pennsylvania House facility in Lewisburg, PA.

Site Description

The Pennsylvania House, Inc. facility in Lewisburg, PA is a furniture manufacturing plant in business since the early 1930s. Most of the hazardous materials at this facility are furniture finishes which contain mineral spirits and solvents. These wastes are temporarily stored on site and shipped off-site in less than 90 days.

In March, 1988, PADEP required Pennsylvania House to initiate assessment and cleanup from a spill of furniture stain. 1215 tons of soil contaminated with such chemicals as methyl ethyl ketone, benzene, toluene, ethylbenzene, and xylene were removed and placed in an approved landfill. The groundwater was not contaminated and PADEP approved the remediation activities in April, 1995.

Site Responsibility

RCRA Corrective Action activities at Pennsylvania House were conducted by EPA with assistance from PADEP.

Contaminants

All contamination has been fully remediated. In 1988 1215 tons of contaminated soils were removed under supervision of PADEP. The groundwater beneath the site was not contaminated.

Community Interaction

If there is further action, EPA will inform the public.
